a community-driven BSD Certification

What is the BSD Certification Group?

A number of developers and sysadmins, authors and advocates, have joined together to initiate a BSD certification. The Group members include:

- Richard Bejtlich, educator and author of The Tao of Network Security Monitoring

- Hubert Feyrer, educator and NetBSD committer

- Dan Langille, maintainer of FreeBSD Diary, FreshPorts and BSDCan organizer

- Dru Lavigne, educator and author of BSD Hacks

- Wes Peters, FreeBSD Core Team member

- Jeremy C. Reed, educator and NetBSD committer

- David Rhodus, DragonflyBSD committer

- and others...

Our commitment

The BSD Certification Group is committed to developing a certification process that reflects the superior quality of BSD operating systems and the real-world skills of experienced BSD administrators. We are also interested in paving the way for a new generation of BSD professionals.

We are also committed to working with the BSD communities to ensure that the BSD certification standard is relevant and provides value for both testing candidates and employers.

How can I help?

Get involved. While we are currently at the beginning stages of exam development, we invite you to become a part of this community-driven project. We are currently seeking:

- translators as this is an internationalized certification effort

- sponsorships

- interviews and articles in the media

Spread the word. Tell your local employers, educational institutions and user groups about this exciting project. See the Contribute and Contact Us sections of our website for more details.

Where can I find more information?

On the Internet:

http://www.BSDCertification.org

Mailing lists for BSDCert and BSDCert-announce:

http://lists.nycbug.org/mailman/listinfo/bsdcert

http://lists.nycbug.org/mailman/listinfo/bsdcert-announce

Gmane for RSS feeds of the general list and more:
